LIGHTNING AWARENESS

November to January, storms are more active in this period, with the often changing climate it is noted that severe thunderstorms are noted and a rule of thumb is :

WHEN IT ROARS – GO INDOORS !!!

There is NO safe place outside when there is lightning but these actions may slightly reduce your risk of being struck

Avoid open fields, the top of a hill or a ridge top

Stay away from tall, isolated trees or other tall objects

Stay away from conductors of electricity like water, wet items, and metal objects such as fences.
