Robberies

Robberies are on the increase on sites and the possibilities to be a victim can also easily happen in an office space.

What to do in case of a onsite/office robbery:

- Don't try to be a Hero, remain calm and do not resist.
- Follow the robber's direction, but do not offer more than what they ask for.
- If possible make mental notes of the robber's appearance.
- Report the robbery immediately to the security or local police station

If an employee was assaulted during the robbery, treat the injured and take the employee to a medical centre as soon as possible .
