

Mine Residue Disposal Workshop 2024

19 to 22 August 2024
Optional site visit - 23 August 2024

Workshop invitation

Fraser Alexander is the largest outsourced tailings contractor, managing more than 100 tailings storage facilities worldwide.

Due to increased requests Fraser Alexander is pleased to announce that we will be offering our Mine Residue Disposal Workshop, which will take place this August 2024. The workshop includes an optional site visit to one of the operations we manage.

The content will cover a range of tailings management topics, including the South African regulatory landscape and the evolving international best practices, such as the Global Industry Standards on Tailings Management.

Purpose of the workshop

The Mine Residue Disposal Workshop equips mine management and operations teams with the necessary knowledge to fulfil legal and company obligations. It covers skills for managing, operating, and monitoring tailings disposal sites, focusing on legal, contractual, and operational requirements, with technical support. The goal is to **enhance** the **understanding of tailings** risks, and the management thereof.

Target audience

Mine management, technical personnel, contractors, consultants, plant operators and anyone else with a responsibility for tailings. The workshop will focus on the South African region.

Workshop details

The workshop will take place from **19 to 22 August 2024** at the **Kopanong Hotel & Conference Centre**, with an optional site visit on the 23rd of August 2024.

Additional offerings

We do offer more technically and operationally focused courses and master classes separately.
